

Liquid Soybean Inoculant

XiteBio® Technologies, Inc. • 204-257-0775 • Winnipeg, MB • www.xitebio.ca

XiteBio Technologies Inc. – an ag biotech company – develops biological products including inoculants for agriculture.

The company's newest product is XiteBio® SoyRhizo liquid inoculant with Advanced Growth Promoting Technology (AGPT) for soybeans.

"XiteBio SoyRhizo has shown outstanding performance with positive growth effect in all the soybean field trials and has provided more than 9% yield increase in soybean," says Dr. Manas Banerjee, president and CEO. "With AGPT, XiteBio SoyRhizo not only introduces optimum numbers of *Bradyrhizobium japonicum* into the soil, but also invigorates the natural soil microflora to create a synergy between them.

"The native microbes in the soil (e.g., bacteria) are stimulated by AGPT. This is what makes AGPT a revolutionary technology," Banerjee says.

Features

- Active ingredient: 2x10⁹ *Bradyrhizobium japonicum* per gram.
 - Supplied as a ready-to-use seed-applied or in-furrow unique liquid formulation.
 - Seed application rate of 2.0 fl. oz. per 60 lbs. (60 ml/27 kg) of seed.
 - Compatible with most popular soybean seed treatments.
 - Extended shelf life (two seasons).
 - Natural and GMO-free product.
- "In 2011, XiteBio SoyRhizo produced

Soybeans with XiteBio® SoyRhizo

a nine bushel per acre average yield increase," says Banerjee. "We had one yield increase of 26 bu. per acre."
