

Thriving Through Innovation

XiteBio Technologies/AGI STORM Seed Treater Offer

XiteBio is a manufacturer and distributor of premium biological products. XiteBio wishes to increase customer awareness of our leading liquid seed inoculants known as XiteBio SoyRhizo and XiteBio PulseRhizo with leading retailers and farmers in North America.

The STORM Seed Treater provides the ultimate seed treating solution for modern-day farming and retail operations. Unlike other seed treaters, the STORM accurately measures untreated seed directly from the bin, precisely meters and applies the seed treatment, gently mixes the see for consistent, even coverage and then transfers the treated seed into the truck, ready to be planted in the field. The simplified process provided by the STORM FX reduces user exposure, making in-the-yard seed treating safe, simple and convenient, while giving you total control over the seed treating process.

The AGI seed treater program is designed to offset the cost of a retailer purchasing a STORM Seed Treater to treat soybeans and pulse seed by offering a direct to retail or grower product rebate.

Program Reward

The purchaser of a STORM Seed Treater can claim up to a maximum of 3,600 complementary units of SoyRhizo valued at \$15,120.00 and 18 complementary cases of PulseRhizo valued at \$9,558.00 over three years. For full program details, retailers or growers should contact their local XiteBio or AGI sales representative. Contact information for XiteBio can be found at www.XiteBio.ca. For details on STORM, please visit www.stormtreaters.com, email storm@aggrowth.com or call 1.855.662.6609.

Contact information for XiteBio can be found at www.XiteBio.ca.
