

CEO's Corner

With harvest nearly complete and final numbers coming in, we at XiteBio® are extremely pleased to have contributed to any success you experienced in the field. Results have varied depending on crop and region. Heavy rain and humidity in both Canada and the U.S. posed challenges and caused potential issues. However, reports are forecasting record-breaking soybean yields in the U.S., along with higher than expected yields for oats and barley in Saskatchewan. Given the overall positivity surrounding this harvest season, we're thrilled to see the success of our partnership and proud to have played a part in it.

With the word "tariff" still looming on both sides of the border, it's more important than ever to get the best bang for your buck as you prepare for the upcoming spring. With our 15th year of operation now in the rearview mirror, we're confident that the strong relationships we've built with distributors, retailers, and growers will help us weather any uncertainties ahead. Our commitment to our valued partners remains strong to deliver the quality, performance, and customer service you've relied on for the past 15 years. We hope our products continue to support sustainable practices in your region and contribute to producing Healthier Plants and Better Yields.

Wishing you a bountiful harvest and a happy Thanksgiving to our partners on both sides of the border.

-Manas Banerjee

Inoculants & Ag-Biologicals

Revamped Sales Team

XiteBio® Technologies is proud to announce a pair of new additions to our Canadian sales team. The new face in Manitoba, is Brent Van Ryssel.

With years of experience with Federated Coop and AGI, Brent brings his talents to XiteBio Technologies to bolster our already talented Western Canadian crew.

"I grew up on our family farm near Oakbank, Manitoba and still help with it when needed. I've been in the Ag Industry for over 25 years and have seen many changes in equipment and science. Now I'm here to help you on the science side and provide Ag-biologicals for sustainable crop production!" Brent can be contacted at Brent.Vanryssel@xitebio.ca or call him at 204-541-0686.

Also joining the team and will be the newest contact in Eastern Canada, André Chollet. "I began my career years ago with the application of biotechnology with all the benefits that it provides to our growers today. And now, with the increasing demand for

innovation on the farm, inoculants and ag-biologicals become a necessity to build synergies with everything that I might already know in growing a better crop more efficiently." André steps in to help grow our connections in Ontario, Quebec and Atlantic Canada. To reach André, email him at Andre.Chollet@xitebio.ca or call him 613-677-2156. With experience

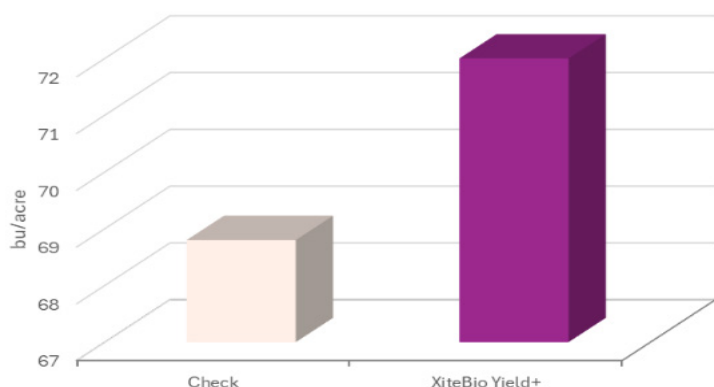

SynAgri, Sollio Ag, and DeKalb, he brings passion to our team and are eager to service your inoculant and ag-biological needs.

Please also note that Robert Lyberg, is no longer working for XiteBio. We wish Bob the best in his future endeavours.

XiteBio® Trial Results

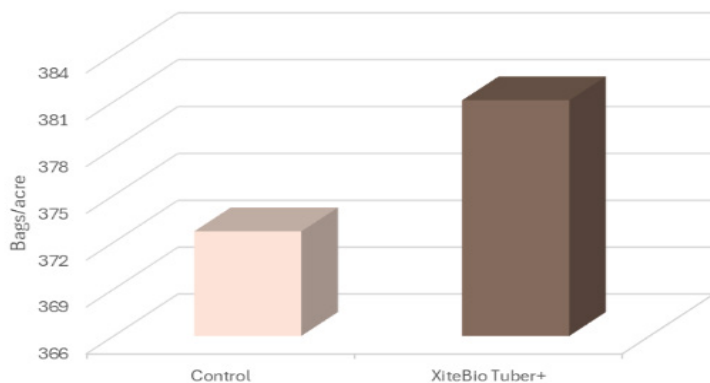

The latest field trial data is in and as expected, XiteBio® Yield+ & XiteBio® Tuber+ continue to deliver superior performance. Wheat crops treated with XiteBio® Yield+ are demonstrating an average yield increase of 2.8 bushels per acre compared to the untreated check. These results have been consistently observed across multiple trials, including those conducted with Double Diamond Farm and New Era Ag Technologies, both based in Manitoba. While the potatoes trial with SynAgri in Quebec saw XiteBio® Tuber+ treated sections has a 19 bag/acre increase.

Start Planning for 2026

With harvest nearly wrapped up, its a perfect time to start looking ahead for 2026. One of our Premium Liquid Innoculants or P-Solubilizing Ag-Biologicals can aid in growing Healthier Plants and Better Yields for a variety of crops. For more information on our products, please visit xitebio.ca or contact a member of our sales team at 1-855-XITEBIO (948-3246).

XiteBio® SoyRhizo®

Premium Liquid Inoculant for Soybeans

XiteBio® PulseRhizo®

Premium Liquid Inoculant for Peas, Lentils & Faba Beans

XiteBio® Yield+

P-Solubilizing Ag-biological for Oilseeds, Cereals, & Legumes

XiteBio® OptiPlus®

Dual Inoculant for Soybeans

XiteBio® Tuber+

P-Solubilizing Ag-biological for Tuber Crops

XiteBio® Vegi+

P-Solubilizing Ag-biological for Vegetable Crops

All Products Ecocert Certified Organic

Did You Know?

•Wheat is grown on more land globally than any other crop, covering over 540 million acres.

•One acre of wheat can feed nearly 9,000 people for a day. That's a lot of sandwiches!
