

XiteBio® SoyRhizo® XV

Premium Soybean Inoculant

New Lower Rate Formulation

XiteBio® SoyRhizo® XV for soybean is an innovative premium liquid inoculant with Advanced Growth Promoting Technology (AGPT®) that delivers better plant vigor and higher yields. XiteBio® SoyRhizo® XV has a lower seed applied use rate (0.75 fl oz 140k) that allows seed treaters to maximize on-seed treatment potential, where a reduced application rate is beneficial, without sacrificing inoculant quality.

Why use XiteBio® SoyRhizo® XV?

- Ready-to-use, all-in-one, liquid formulation
- No sticking/reduced bridging of seeds
- Provides a minimum of 1×10^{10} *Bradyrhizobium japonicum* per gram
- Lasts up to 120 days on-seed with most seed treatments
- Invigorates the native bacteria to work with introduced rhizobia
- Encourages greater root nodulation and boosts nitrogen fixation
- Works under different soil and environmental conditions
- 2 year shelf life
- Compatible with most seed treatments and fertilizers
see compatibility charts

Handling Guidelines

- Shake well before use
- Open package only when ready to use
- Store product in a cool place between 39° F and 77° F, away from direct sunlight and wind
- Do not allow product to freeze

Application Rate

On-Seed:

0.9 fl oz/bu or 27 mL/27 kg
(0.75 fl oz/ 140k unit; 1 unit = 50 lb)

Case Size

4 x 60.9 fl oz (4 x 80 Unit Case)
1 x 304.5 fl oz (1 x 400 Unit Case)

Case Treats

On-Seed (4 x 80 Unit):

16,000 lb or 320 units (268 bu)

On-Seed (1 x 400 Unit):

20,000 lb or 400 units (333 bu)

Please read product label carefully & follow application directions

Application Rates: 27 ml/27 kg or 0.9 fl oz/bu of seed / 0.75 fl oz/140k unit = (50lb)

NOTE: SoyRhizo[®] XV may be applied with approved seed treatment products either simultaneously, sequentially, or in a tank mix (slurry). If a tank mix is used, the mixture must be applied to the seed immediately and only the amount that can be applied to the seed in an hour should be premixed.

Note: All products listed in this chart have been tested according to samples provided to XiteBio Technologies Inc. However manufacturing quality can vary from lot to lot of an individual product. It is recommended that a jar test be completed prior to mixing to ensure physical compatibility. For more information on performing a jar test please visit <https://xitebio.ca/inoculant-and-biological-faqs/>
